#LetsTalkAboutAir

Webinar: **AIR QUALITY IMPROVEMENT - MEASURES, PLANNING, AND STRATEGIES**

February 25, 2021 / 09:00 - 11:30 / Agenda

BiH ESAP 2030+

Activity summary

The webinar is designed to provide participants with information on planning strategies, policy reforms, and country case examples, focusing on best practices aimed at reducing air pollution. The goal of the webinar is to pinpoint relevant air pollution reduction examples from EU member states, which will be useful for experts working in the development of the BiH Environmental Strategy and Action Plan. These case studies will outline policy measures, identify stakeholders involved, and present lessons learned in other countries when developing air quality improvement strategies. The experts will also provide information on how countries should develop planning strategies, bearing in mind different EU requirements.

Moderators

Azrudin Husika and Goran Trbić

Panelists

Eleni Michalopolou joined Stockholm Environment Institute at York in 2020 as a member of the Air Pollution group where she contributes to Climate & Clean Air Coalition (CCAC) projects and the Supporting National Action and Planning (SNAP) on Short-Lived Climate Pollutants (SLCPs) initiative. She is a coauthor in the IPCC's 2019 Refinement to the 2006 IPCC Guidelines for National Greenhouse Gas Inventories, working closely with the aluminum, semiconductor, and gas abatement industries.

Lauri Tammiste is director of SEI Tallinn and has extensive experience in energy, energy efficiency, and innovation policy design, analysis, and program management. Among other engagements, he worked at the Estonian Ministry of Economic Affairs and Communications and served as member of the management board of the Estonian Environmental Investment Centre (EIC).

Christian Nagl is a senior air quality expert, part of the Air Pollution Control, Buildings & Registries team at the Environment Agency Austria (Umweltbundesamt). He is a physicist and has worked for Umweltbundesamt since 2002. An expert in air quality management and climate change mitigation measures, he has gained several years of experience in conducting and managing studies concerning air quality problems on local, regional, and national scales, including quantification of the impact of air pollution on human health and the environment.

Registration
